

# Survey on EV Charging Stations

The board of directors is looking into the feasibility, cost and benefits of installing the required electric infrastructure to allow owners to install electric charging stations in their parking spot. Help us understand our current and foreseeable future needs by taking this quick survey.

1. How is your current car propelled?

- Internal combustion engine (gas/diesel)
- Hybrid (not requiring plug in to charge)
- Plug-in hybrid (plug in to charge with internal combustion engine back up)
- Electric

2. Do you anticipate acquiring an electric or plug-in car in the future (requiring access to a charger)?

- Yes
- No
- Don't know

3. If you anticipate acquiring an electric car, what is the time horizon?

- Next year
- 2-3 years
- 3-5 years
- More than 5 years
- I don't know
- I don't anticipate acquiring an electric car

4. Regardless of your answer to the question above, if we were to install an electric vehicle infrastructure, would you be interested in acquiring/installing a charger in your parking spot in the first wave (say within a year) at an approximate cost of \$5,000. This is the estimated cost for the charger and its installation. This is in addition to the corporation's cost to install the infrastructure. There are financial incentives for the corporation and early adopters if we get at least 20 initial chargers and if we qualify for a federal grant.

- Yes
- No
- Not in the first wave but maybe later

# Survey on EV Charging Stations

5. If we were to install EV charging stations, should we install some in the visitors parking? Such charger(s) would require users to pay for consumption.

- Yes
- No
- Don't know

If yes, how many?

6. Please feel free to provide any comments you may have on the contemplated implementation of EV charging infrastructure.

7. What is your unit number? This will only be used to help identify duplicates and will not be shared with anyone.

8. How many parking spots do you own here?

9. What is your parking number? Please ensure you identify which level your parking is on. If you have more than one spot, please list all of those where you would anticipate installing a charging station. This may allow us to identify where to locate transformers/electric panels.
